

## Integrated Services, Inc. Nominated for Tech Titans Emerging Company Horizon Award

**Dallas, TX — June 29, 2009 — Integrated Services, Inc. (ISI)** today announced it has been nominated for the Metroplex Technology Business Council's (MTBC) Tech Titans Emerging Company Horizon Award. The MTBC is the largest technology trade association in Texas, and is dedicated to the promotion of the high tech industry in the DFW area. The MTBC Tech Titans Awards recognize companies in categories designed to showcase the most cutting-edge technologies and the brightest talent emerging from the North Texas region. The winners will be announced at the Tech Titans Awards Gala on August 28 in Richardson.

*"I was personally impressed by the people and product at ISI, but also by the company they keep. When one of the world's premier software companies comes calling [on ISI] for expertise on their own systems, that's impressive,"* says Dave Woods, VP at Texans Insurance Group, who nominated ISI for the award.

Mr. Woods nominated ISI for their SQLRx<sup>®</sup> which is the culmination of 30 years of proven "best practices" in optimizing databases and system architecture. SQLRx leverages the standard performance metrics available within Microsoft's SQL Server and Windows Operating Systems, and wraps ISI's unique WinPerf<sup>®</sup> tool around them.

*"Rationalizing and managing data bases can be seen by some as the "Dirty Jobs" of the IT world. But like most dirty jobs, this one is critical to well-balanced, smooth-running systems,"* says Woods.

The uniqueness and depth of WinPerf, in correlating disparate Operating System and Database Performance data into an analytical presentation to identify, decode, and resolve SQL Server performance issues, is innovative in that traditional tools and data monitors only collect and analyze some of the data to be deciphered. WinPerf collects data from multiple systems and correlates this data in a distinct presentation to immediately expose and decode performance issues. A proprietary SQLRx Assessment Report is automatically generated, and includes a color-coded Executive Summary and Action Plan to distill the good, the bad, and the ugly, as well as to precisely outline the remedy.

### **About Integrated Services, Inc.**

Since 1985, ISI has been a recognized leader in delivering IT strategy and architecture solutions for Fortune 500 and high growth companies in the greater Dallas/Fort Worth market. Our focus is on "Turning Data into Profit." With Big 6 disciplines, much of ISI's success is attributed to its depth in project and client management, which is made available to ISI clients with the flexibility and cost effectiveness of a smaller, regional firm. Leveraging Microsoft platforms, ISI delivers powerful and cost-effective self-service solutions to get the "Right Data, to the Right People, at the Right Time," assuring ISI clients of maximum benefit and ROI. ISI has received numerous awards from its partners, including 2008 Global Partner of the Year in Data Management, Marketing Excellence and Teamwork Awards from Microsoft. ISI is also the founding sponsor of the DFW SharePoint Users Community. To learn more about ISI, go to [www.isi85.com](http://www.isi85.com).
