

Integrated Services, Inc. to Speak at the Computer Measurement Group International Conference

This marks the 19th invitation to present at CMG's International Conference

Dallas, TX — July 1, 2009 — Integrated Services, Inc. (ISI) today announced that its SQLRx[®] division Senior Systems Architect, Jeffry Schwartz, will conduct a half day course at this year's Computer Measurement Group International Conference being held December 6 – 11, 2009 at the Gaylord Texan in Grapevine, TX (www.cmg.org). This marks the 19th consecutive conference that Jeff has been invited to present at, making him one of the most highly sought after speakers since the conference began. He is a well-respected member of the Computer Measurement Group, and has served on the editorial review board for 10 conferences. He has also judged submitted papers and served as a national officer nomination committee member.

ISI's SQLRx practice is the culmination of proven industry "best practices" and ISI's years of experience optimizing database and system architecture and performance. Jeff has over 30 years of industry experience developing and delivering state-of-the-art consulting services in these areas. His CMG course entitled **Windows System Performance Measurement & Analysis** is designed for DBAs and developers, and is a basic tutorial which introduces the metrics available from the Windows operating system and most prevalent applications. It will provide the necessary information to enable the Windows performance analyst to ascertain what the most important metrics are, how to interpret them, and the most appropriate collection mechanisms.

About Integrated Services, Inc.

Since 1985, ISI has been a recognized leader in delivering IT strategy and architecture solutions for Fortune 500 and high growth companies. ISI's focus is on Turning *Data into Profit*.[®] Leveraging Microsoft platforms, ISI delivers powerful and cost-effective self-service solutions to get the *Right Data, to the Right People, at the Right Time*[®], assuring clients of maximum benefit and ROI. About SQLRx[®]

SQLRx is a managed practice of ISI. It is the culmination of proven industry "best practices" and ISI's years of experience optimizing database and system architecture and performance. It encompasses SQL Server performance tuning, capacity planning, disaster recovery, RemoteDBA[®] monitoring, upgrades and migrations. In most cases, SQLRx gives clients the added benefit of eliminating the need to purchase additional hardware or to rebuild systems or applications. Microsoft honored SQLRx with the 2008 Worldwide Partner of the Year Award for Data Management. To learn more about SQLRx go to www.sqlrx.com.
