

DFW SharePoint Community Kicks Off 6th Year

One of the world's oldest and largest SharePoint Communities Celebrates Success

Dallas, TX – May 20, 2011 – Integrated Services, Inc., the founding sponsor of the [DFW SharePoint Community](#), is pleased to announce that they will be kicking off the group's 6th year this June. As a meeting place for end-users, developers, and executives interested in using Microsoft SharePoint and related technologies, the group's objective is to provide resources for success through monthly meetings and an on-line Knowledge Forum. In just five short years the group has grown to 1400 members, making it not only one of the oldest, but also one of the world's largest SharePoint communities. The DFW SharePoint Community is the only officially recognized SharePoint user group in North Texas, and is a place where SharePoint users can share best practices, gain exposure to certified third-party add-on products, and provide a connection point for market and SharePoint resources. In order to offer a wide variety of information and resources to the members, the group now has ten sponsors that commit their time, expertise, and money to ensure members get the most out of attending the meetings.

In today's mobile workplace, it is becoming increasingly important to harness intellectual property, empower individuals with critical information, and do so in a timely and cost-effective manner. Microsoft SharePoint provides the platform to do just that. The DFW SharePoint Community provides the local community with an excellent forum for exchanging ideas and best practices.

There is no charge for becoming a member or to attend the meetings, which are held on the 3rd Tuesday of each month at Microsoft's Las Colinas campus. For more information on meetings or to register as a member, please visit www.DFWSharePoint.com.
